

## Jalis

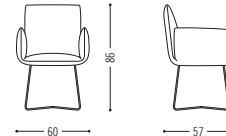

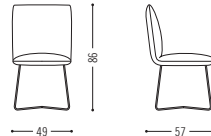

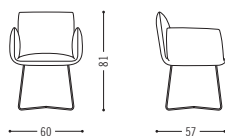

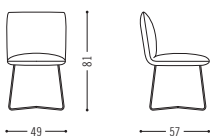

Kissen sind archetypische Sitzmöbel, besonders in den arabischen Ländern. Mit den Jalis Stühlen werden sie auf europäisches Sitzniveau gehoben und zum Stuhl verwandelt. Was aussieht wie ein Kissen mit Knick, ist ein aufwändig gepolstertes, bequemes und stabil konstruiertes Sitzmöbel und ein Verwandter des gleichnamigen Sofas. Den Stuhl gibt es mit verschiedenen Gestellen, von Holz bis Metall.

Cushions are archetypical pieces of seating furniture, especially in Arab countries. With the Jalis chairs they are raised to a European seating level and transformed into chairs. What looks like a cushion with a kink in it is in fact a complexly upholstered, comfortable and stably built item of seating furniture and a relative of the eponymous sofa. The chair comes with different frames, ranging from wood to metal.

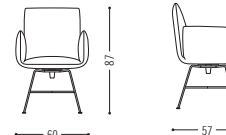

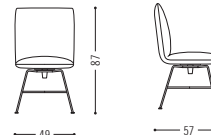

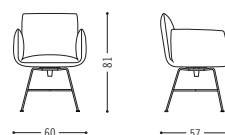

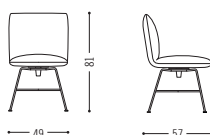

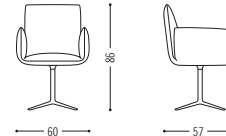

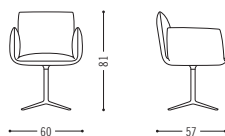

### Spezifikationen Specifications

#### Drahtgestell wire legs

Armlehnenhöhe 67 cm  
armrest height 67 cm

#### Metalldrehgestelle metal swivel frames

#### Holzgestell wooden frame
